Claims 11 and 15-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Srimanth et al in view of Ferrara et al, US Patent 6455283, filed 3-10-1999.. The latter in the field of treatment of cancer teaches that a cell from a tumor of a patient in need of treatment can be contacted with a compound which is a drug candidate and the ability of that compound to inhibit VEGF production is measured. See col. 5, lines 44-67. See also col. 37 line 63 to col. 4, line 19. It of course also teaches that that high VEGF production is present in cancerous tumors. See col. 1, lines 35-39 and col. 1, lines 50-62.

See also col. 31, lines 30-33, especially "other drug candidates" in lines 32 and 33. See also col.6. The former teaches that the instant 3-heterocyclyl-coumarins are active against cancer cell. Thus it would have been obvious to test the instant compounds' inhibition of VEGF in a tumor cell of a patient in need of treatment

Claims 11 and 15-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Srimanth et al in view of Ferrara et al and Hirth et al. The last reference buttresses what is taught by Ferrara et al that level of VEGF production by cancer cells is a measure of their virulence.
